TECHNICAL SKILLS

Languages: Java, Python, SQL, R, JavaScript

Data Science & AI: Power BI, Machine Learning (Scikit-learn, Pandas), Data Visualization

Web Development: Spring Boot, React.js, REST APIs, HTML, CSS, MySQL

Tools & Concepts: Git, Postman, IntelliJ IDEA, VS Code, OOP, SDLC

SOFT SKILLS

Teamwork, Problem-solving, Time management, Communication, Leadership, Creativity

PROFILE

Recent BSc Graduate from the University of Peradeniya specializing in Computer Science, Mathematics, and Statistics. Experienced in Java, Python, and Power BI, currently applying these skills as an Industrial Engineering Intern at Ansell. Seeking a challenging opportunity to contribute to Software Engineering, Data Science, and Data Analysis tasks in an industrial environment.

EDUCATION

B.Sc. (Completed requirements)
Faculty of Science, University of Peradeniya
Majors: Computer Science, Statistics, Mathematics

EXPERIENCE

Industrial Engineering Intern
Ansell Textiles Lanka, Seeduwa | [January, 2026] - Present

- Conducted comprehensive capacity analysis to evaluate production capabilities and streamline manufacturing planning processes.
- Designed an individual efficiency tracking system using Power BI, enabling data-driven operator development and real-time performance monitoring.
- Analyzing changeover data to identify operational bottlenecks and developing a real-time tracking system to minimize machine downtime.
- Maintain and update Standard Minute Value (SMV) databases in Advanced Excel to ensure accurate capacity forecasting.

PROJECTS

Sales Performance Dashboard | Power BI ,DAX 2025

- Developed an interactive dashboard to analyze sales trends, orders, and regional performance.
- Implemented data modeling and DAX measures to provide actionable business insights.
- Integrated drill-down features and dynamic filters for enhanced data exploration.

View on Linkedin

Meta Ad Performance Dashboard | Power BI ,DAX 2025

- Developed an interactive dashboard to analyze marketing funnel metrics from impressions to purchases.
- Implemented Star Schema and DAX for dynamic KPIs like ROAS and Conversion Rate.

EXTRA-CURRICULAR ACTIVITIES

- Member – University Karate Team, University of Peradeniya
- Member – Computer Society, University of Peradeniya
- Member – Data Science Society, University of Peradeniya
- Member – Statistics Circle, University of Peradeniya

CERTIFICATIONS

- Career Essentials in Data Analysis Microsoft and LinkedIn (2026)]
  View Certificate
- Tools for Data Science IBM on Coursera (2026)
  View Certificate
- Career Essentials in Generative AI Microsoft and LinkedIn (2026)
  View Certificate
- What is Data Science? IBM on Coursera (2026)
  View Certificate
- Intro to Machine Learning Kaggle (2025)
  View Certificate
- Databricks Fundamentals Databricks Academy (2025)
  View Certificate
- Introductory Computer Programming (Python)
  University of Peradeniya
  View Certificate

PROJECTS(CONTINUATION)

Hostel Management System | Java Spring Boot, MySQL 2025
University of Peradeniya

- Automated hostel operations at the University of Peradeniya, including room allocation and fee payments.
- Streamlined student eligibility filtering and integrated a real-time complaint tracking system.

View on Linkedin

Vehicle Speed Detection System 2025

- Developed a real-time computer vision system to detect vehicles and estimate speed from video footage.
- Implemented object detection using YOLOv8 and custom tracking logic to calculate speed based on pixel distance traversal.
- Technologies: Python, OpenCV, YOLOv8, Pandas

View on Linkedin

LumiDoc AI - Chat with PDF 2025

- Developed an intelligent chatbot using RAG technology to answer questions from multiple PDF documents.
- Technologies: Python, Streamlit, LangChain, FAISS.

View on Linkedin

Sentiment Analysis Project 2025

- This project is a Flask-based web application that performs sentiment analysis on user input (comments or reviews) using a trained machine learning model (Logistic Regression).

View on GitHub

Arduino CNC Plotter | Arduino Uno, C++, Robotics 2024

- Developed an automated CNC machine for high-precision lettering and artistic drawing.
- Streamlined personalized design tasks using low-cost hardware and open-source software.
- Designed for accessibility in educational and small business environments.
